

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of the Claims:

Claim 1 (currently amended) ~~4.~~ A dry cleaning process for in-home dry cleaning ~~comprising a low-aqueous dry cleaning~~ consisting essentially of a first step of contacting a laundry article with a low-aqueous dry cleaning composition, wherein said composition comprises a non-flammable, non-chlorine containing organic dry cleaning solvent, water and surfactant, whereby the water to cloth ratio (w/w) is less than 0.25 and the water to surfactant ratio (w/w) is at most 1.5, wherein said organic dry cleaning solvent is selected from hydrofluorocarbon, hydrofluoroether and siloxane solvent, whereby the liquid to cloth ratio (w/w) is at most 10; and a subsequent step of rinsing the article with only dry cleaning solvent.

Claim 2 (previously presented) A dry cleaning process for in-home dry cleaning claim 1, whereby said liquid to cloth ratio (w/w) is at most 7.

Claim 3 (cancelled)

Claim 4 (cancelled)

Claim 5 (previously presented) A dry cleaning process for in-home dry cleaning according to claim 1 wherein the surfactant comprises at least one polar hydrophilic group selected from -SO₄M, -SO₃M, -PO₄M₂, -PO₃M₂, -CO₂M and mixtures thereof

wherein each M can be independently selected from the group including H, NR₄, Na, K and Li, wherein each R is independently selected from H and C₁₋₄ alkyl radical.

Claim 6 (previously presented) A dry cleaning process for in-home dry cleaning according to claim 1 wherein the organic dry cleaning solvent is selected from the group consisting of the isomers of nonafluoromethoxybutane, nonafluoroethoxybutane and decafluoropentane, octamethyl cyclotetrasiloxane, decamethyl cyclopentasiloxane, decamethyl tetrasiloxane, dodecamethyl pentasiloxane and mixtures thereof.

Claim 7 (previously presented) A dry cleaning process for in-home dry cleaning according to claim 1 whereby the laundry article is stained with domestic stain material selected from kitchen grease, particulate soil and mixtures thereof.

Claim 8 (previously presented) A dry cleaning process for in-home dry cleaning according to claim 1 wherein the water to cloth ratio (w/w) is less than 0.25 in each step of the dry cleaning process wherein the LCR is more than 1.
